About

WHAT THE APP HOLDS

Surgeons & surgery centers	1,596
Corporate Equality Index scores	112
Community & web reviews	69
ZIP codes mapped	145
ZIP codes scored on evidence	52
Businesses swept	9,809

BUSINESS SAFETY SCORE

High · 95–100	50
Mixed · 85–94	1
Low · below 85	1
Not enough local evidence	93

Presentation walkthrough

An interactive map and LGBTQIA+ search tool — concept to finished build.

Who I am

Hi, I'm Eve Panzarino, a student at Full Sail University.

What I made, and why

A surgery database that is actually searchable. The information exists on Reddit, but it is not easy to search.

Who it is for

LGBTQIA+ people looking for gender-affirming surgery, affirming services, or a gender-neutral bathroom.

The concept

An interactive map and LGBTQIA+ search tool, with safety scored per ZIP code from evidence.

Prototype to reality

Milestone 1 was a wireframe on Figma. I chose which APIs I wanted to use in the project, and it grew from there.

How I worked

I created issues weekly to commit what I had done on the app.

The finished build

Milestone 4 in the browser — five pages, accounts and saved favorites.

Final thoughts

This project developed into more and more, and became more organized as more data was brought in. Thank you for your time.

THE PAGES

Search Affirming businesses near you, with reviews and Corporate Equality Index scores.

Surgeries 1,596 surgeons and centers, filtered by procedure.

Services Gender-neutral restrooms and affirming services, mapped.

Heatmap A Business Safety Score per ZIP code, built from evidence.

About The method, the sources, and how the score is reached.
